ABOUT ME ::

I have a passion for problem-solving, creating beautiful, user-centred design solutions, collaboration and learning. I am a self-motivated, fast and eager learner with great time management and attention to detail. I have a variety of design experience in product UI, UX, web & print, which is complemented by my experience in design studio coordination & account management, technical support and working knowledge of HTML & CSS.

EXPERIENCE ::

Multidisciplinary Designer - Freelance *May 15' - Present*

Web Design and Front End Development Product UX, and UI design, information architecture, responsive website design and static site development, Shopify templates and Wordpress sites.
Graphic Design Print and digital layouts, branding, digital and freehand illustration.

Technical support / Product design - Chatlio *Nov 18' - Present*

Remote technical support specialist for a popular web chat application company. My role includes helping new and existing customers with integration and troubleshooting, as well as working closely with engineers to design and test new UI and features for the web application.

UX/UI Product Designer - Marketplacer *March 16' - Sep 18'*

Design, prototype and test new features. Refine existing interfaces & user experiences. Conduct user research. Create low & high fidelity UI. Engage in peer reviews, critiques and collaboration. Communicate design proposals and decisions to key business stakeholders, product managers and engineers. I also helped introduce design version control and provided design support within the business when required - including branding, print, web and marketing materials.

SKILLS ::

I have a range of design experience accumulated over almost 10 years in different design and business roles working both onsite and remote.

Focusing on product UX and UI design, responsive website design and basic front-end development (HTML & CSS). I love working collaboratively within a team, though just as comfortable working autonomously, and I am confident communicating my design decisions to team members, engineers, clients, and key business stakeholders.
